## PROJECTS

**Pixelates (Rails, React)** | [live](#) | [github](#)

*A web application for making and sharing pixel art.*

- Drawings can be downloaded to a local machine or saved to user's account by making use of the dataURI conversion that is native to HTML5 Canvas objects.
- Fast brush rendering with path-finding algorithm that overcomes the browser's limitations on the number of mouse events triggered.

**Chess (Ruby)** | [github](#)

*2-player terminal chess game.*

- Leverages best-practice, object-oriented design patterns, such as: inheritance, encapsulation, polymorphism, and null-object.

**Rails Lite (Ruby)** | [github](#)

*Webserver MVC framework with ORM inspired by Rails.*

- Executes database queries using metaprogramming.
- Builds responses by parsing templates into strings using ERB.
- Draws and runs routes using regex matching.
- CSRF protection implemented at the router level.
